

Protected A (when completed)

Important Information for Alberta Health Application Users

Conditions of application use

The user working for, or on behalf of a custodian, is an affiliate of that custodian under the *Health Information Act* (HIA). Under the HIA, custodians are responsible for any access to, or collection, use or disclosure of health information by their affiliates and the custodian should ensure appropriate oversight and monitoring of affiliates takes place.

The user must understand that inappropriate collection, use and/or disclosure of individually identifying data obtained through any Alberta Health application may result in:

- notification of any inappropriate use to relevant employer;
- penalties as described in the relevant legislation;
- disciplinary action;
- termination of the user's ability to access Alberta Health applications; and
- notification of any inappropriate use to the relevant professional regulatory authorities.

Instructions for Completion of this Form

The following identifies the steps for registering and obtaining an external user ID. All information provided must be accurate. A request for a user ID will take a minimum of 15 business days to process.

Section A – User information to be completed for a user requiring access to the system.

Organization Name is the legal name of the organization; for H-Link, this is the accredited submitter's name.

Note: User requiring access to more than one site must complete a separate form for each site. The form for each site must be signed by the appropriate access administrator.

Token/fob selection - Remote access is handled by the AHS Remote Access Team. There are two types of tokens:

Hard token (hardware –“fob”) and Soft token (software issued to a user's mobile device (e.g., iPhone)). **All external users must request a soft token unless the user does not meet soft token prerequisites.** If hard tokens, or the devices the soft token is on are stolen, please contact the AHS Remote Access Team immediately at 1-844-542-7876.

Hard token return procedure - If the user has a hard token and no longer requires access to an application(s), an External User ID Application Access Request form must be submitted to delete the user ID from the application. Also, the user's hard token (if one was provided) can be disposed in the garbage (if expired). The expiry date is on the back of the token. To return a token that is no longer required but has not expired, pack it in a bubble style envelope to protect the token and mail it to the address below

AHS Remote Access Team
CN Tower, 16th Floor,
10004 104 Ave NW
Edmonton, AB T5J 0K1

Section B – Access Administrator Authorization - Access Administrator's Information

The Access Administrator completes Section B to authorize the creation of user ID detailed in Section A or amend/delete an existing user ID (see Fob return procedure above).

Note: If the user identified in Section A is the access administrator, a custodian must sign Section B. The access administrator cannot authorize their own access unless they are the sole owner of the organization.

Section C - Alberta Health Approval - Alberta Health use only.

Protected A (when completed)

The information on this form is being collected and used by Alberta Health pursuant to section 20(b) of the *Health Information Act* and section 33(c) of the *Freedom of Information and Protection of Privacy Act* solely for the purpose of creating, amending or deleting a User ID. This information will only be disclosed to the authorized Alberta Health staff involved in processing requests.

*** All fields in Section A, B and C are required ***

Section A - User information - To be completed by the applicant.

Please select one of the following: ☐ Amend (underline amendments) ☐ Delete ☒ Create ☐ Name Change

Start Date yyyy-mm-dd 2026-08-17 End Date yyyy-mm-dd 2031-08-17
