

Sky Claims

Provincial Provider Onboarding Guide

British Columbia · Alberta · Ontario · Manitoba · National Architecture

Overview — Three-Layer Registration Framework

Sky Claims provincial onboarding is structured around three registration layers that apply across all provinces, though the specific forms and processes differ by jurisdiction.

Layer 1 — Practitioner Registration

Establishes the provider with the provincial payer. Confirms the practitioner holds a valid billing number and is enrolled with the provincial health authority.

Layer 2 — Clinic / Payee / Business Arrangement

Establishes where and how the provider is paid. Sets up the clinic (if the clinic receives payment on behalf of the provider), or the private practice, so the government knows who to pay.

Layer 3 — Electronic Claims Authorization

Authorizes Sky Claims (or the appropriate submitter) to transmit claims electronically on the provider's behalf. This is where Sky Claims enters the picture after Layers 1 and 2 are confirmed.

***Note:** Sky Claims requires a password and a 42-day rotation reminder for every registered practitioner account.*

Alberta

Registration Forms

1. Practitioner Request — AHC 11234

Required for newly licensed physicians who do not yet have a PRAC ID (Alberta Billing ID). Most practitioners will already have one.

2. Facility Registration — AHC 0910A

Usually required. Registers the facility, clinic, or hospital under which billing will be made. Also used to update existing facility information.

3. Business Arrangement and Relationships — AHC 11236

Usually required. Links the PRAC ID to a business arrangement/facility and authorizes Sky Claims to submit on the client's behalf. Always confirm whether the practitioner has an existing business arrangement or needs a new one.

4. Notification of Business Address Change — AHC 11459

As needed. Updates the business mailing address on file.

5. Direct Deposit Request — AHC 1143

Required for independent practitioners. Sets up banking information for claim payment deposits.

H-Link Submission: Decision Tree

The key question at Alberta onboarding is who will be the H-Link submitter.

Scenario A — Client is the Submitter

- Complete AHC 2210 — H-Link connectivity application
- Complete AHC 11236 — business arrangement/relationship
- Connectivity testing with AHCIP
- Sky Claims configuration using client's own H-Link credentials

Note: The clinic independently becomes an AHCIP-accredited H-Link submitter. Sky Claims serves as the billing software interface.

Scenario B — Sky Health is the Submitter (Recommended)

- Client completes AHC 11234 (if needed), AHC 0910A, AHC 11236
- Sky Health maintains accredited H-Link submitter status (prefix HZV)
- Client business arrangement is linked to Sky Health's submitter infrastructure
- Client does not independently become an H-Link submitter

Note: Flow: Clinic → Sky Claims → Sky Health H-Link (HZV) → AHCIP. Sky Claims is the billing software; Sky Health handles the transmission.

Example: Dr. Jane Doe / ABC Optometry Inc.

Step	Scenario A (ABC self-submits)	Scenario B (Sky Health submits)
Practitioner	AHC 11234 (if newly licensed)	AHC 11234 (if newly licensed)
Facility	AHC 0910A (where applicable)	AHC 0910A (where applicable)
Business Arrangement	AHC 11236	AHC 11236
Submitter	AHC 2210 → ABC's own H-Link credentials	Sky Health accredited submitter (HZV)
Sky Claims Role	Billing software using ABC's credentials	Billing software + submitter infrastructure

British Columbia

BC is form-driven. Teleplan has confirmed that vendors connect software directly to the production environment — there is no separate API test phase. Client registration uses the Teleplan Service Application form (HLTH 2820 or HLTH 2771), indicating Sky Claims as the vendor.

Teleplan Service Application Forms

HLTH 2820 — Opted-In Practitioners

Primary form for opted-in MSP practitioners. Captures:

- Practitioner name and MSP payment number
- Practice type
- Data centre: Sky Claims V0127 (or client's own DC number if they have one)
- Software: Sky Claims | Vendor: Sky Health Technologies

Note: The form requires the software to be MSP tested and approved. Sky Claims holds vendor approval.

HLTH 2771 — Opted-Out Practitioners

Same structure as HLTH 2820, for opted-out practitioners. Also requires MSP-approved software.

At onboarding, ask: Are you opted-in or opted-out?

- Opted-in → HLTH 2820
- Opted-out → HLTH 2771

BC Onboarding Steps

Step	Action	Details
1	Obtain MSP practitioner/payee number	Must be in place before Teleplan registration. Form varies by profession — see gov.bc.ca/health/forms/msp
2	Complete Teleplan application	HLTH 2820 (opted-in) or HLTH 2771 (opted-out). Indicate Sky Claims as billing software and Sky Health Technologies as vendor. Data centre: V0127 or client's own DC.
3	Configure Sky Claims	Enter MSP billing number, payee number, opted-in/out status, and practice details into the Sky Claims provider profile.
4	Activate	Sky Claims connects to Teleplan production (teleplan.hnet.bc.ca). No separate API test phase required.

Direct Deposit

Complete BC Ministry of Health form HLTH 2832. Available at gov.bc.ca/assets/gov/health/forms/2832fil.pdf

Ontario

Ontario provider registration is fully electronic as of April 1, 2026. The Ministry no longer accepts paper forms. All registration and maintenance is submitted through the Ministry's secure electronic application.

Registration Steps

A. OHIP Billing Number

Must be obtained before any other enrollment. Requirements:

- Valid certificate/registration with the applicable regulatory college
- Ontario practice address
- Online application: ontario.ca/page/ohip-billing-number-registration
- Banking information for direct payment

Note: Since April 1, 2026, all new provider registration and maintenance is handled electronically only.

B. Health Care Group Registration (if applicable)

Required if the practitioner bills through a group or clinic. A group number is distinct from an individual billing number. Ask whether the practitioner bills individually, through a professional corporation, through a clinic/group, or under an existing group number.

C. Consent and Authorization for Group Membership/Payment (if applicable)

Where group billing applies, the Ministry's electronic Consent and Authorization form establishes the relationship between the individual provider and the group/payee arrangement.

D. MCEDT Enrollment

Once the OHIP billing number is issued, the practitioner registers for MCEDT:

- Register for an OPS BPS Secure account at login.security.gov.on.ca
- Use Ministry-issued unique identifiers to enrol via the eBSE portal (ebse.health.gov.on.ca)

Note: MCEDT enrollment is the step that connects the practitioner to Sky Claims' submission workflow.

E. Health Card Validation (HCV) Enrollment (if applicable)

Enrolled separately via the eBSE portal. Required if Sky Claims will provide real-time eligibility checking for this practitioner.

Ontario New Practitioner Checklist

Government Registration

- ☐ OHIP Billing Number — electronic application
- ☐ **if applicable:** Health Care Group Registration —
- ☐ **if applicable:** Consent & Authorization for Group Membership/Payment —
- ☐ MCEDT enrollment — eBSE portal
- ☐ **if Sky Claims provides eligibility:** HCV enrollment —
- ☐ Banking / direct-deposit information
- ☐ Ontario practice address confirmed
- ☐ Regulatory college registration verified

Sky Claims Setup

- ☐ Provider OHIP billing number entered
- ☐ **if applicable:** Group number —
- ☐ MCEDT credentials configured
- ☐ Provider specialty and service locations
- ☐ Banking / payee configuration
- ☐ Effective date set
- ☐ Fee schedule and billing rules applied

Manitoba

Manitoba operates an explicit vendor/service-bureau model with mandatory software testing before any new site goes live.

Key Registration Elements

Vendor Software Testing

All vendors must test new software with Manitoba Health before implementation. Each new user site — or a site changing billing software — must pass testing before claims can be submitted.

EPiCS Letter of Agreement

The practitioner's clinic/billing operation signs a Letter of Agreement with Manitoba Health's EPiCS (Electronic Physician Claims Submission) program, linking the practitioner to the user site.

User Site Number

The practitioner/billing operation is assigned a User Site Number that uniquely identifies the user within Manitoba's billing system.

Electronic User Number

A Request for Electronic User Number must be completed for each user who will submit claims electronically.

EPiCS User Change/Termination Form

Used when changing or terminating authorized users at a site.

National Sky Claims Architecture

Sky Claims is built on a four-object model that maps cleanly across all provinces:

Provider → Practice/Facility → Payee/Business Arrangement → Submitter/Electronic Claims

Province	Provider ID	Payee / Group	Electronic System	Vendor / Submitter
BC	MSP Practitioner #	MSP Payment #	Teleplan	Sky Claims / Teleplan vendor V0127
Alberta	Practitioner ID (PRAC)	Business Arrangement	AHCIP H-Link	Sky Health (HZV) or client submitter
Saskatchewan	Practitioner/claims reg.	MSB arrangement	MSB electronic	Approved vendor / service bureau
Manitoba	MB Health Billing #	User Site	EPiCS	Approved vendor / service bureau
Ontario	OHIP Billing #	Group # (if applicable)	MCEDT / HCV	Conformant vendor / submitter
Quebec	RAMQ provider #	Group/clinic	RAMQ electronic	Approved billing pathway
New Brunswick	Medicare provider #	Billing/payee arrangement	Provincial claims	Provincial/vendor pathway
Nova Scotia	MSI provider #	Billing arrangement	Electronic claims	Provincial/vendor pathway
PEI	Health PEI provider #	Billing arrangement	Electronic claims	Provincial pathway
NL	MCP provider #	Billing arrangement	Electronic claims	Provincial pathway

Sky Claims — Provincial Registration Wizard

Rather than presenting clients with a stack of forms, Sky Claims guides practitioners through a province-specific decision flow.

British Columbia

Q1: MSP Practitioner / Payee Number?

YES → enter number and proceed

NO → direct to MSP registration (form varies by profession)

Q2: Opted-in or opted-out?

Opted-in → HLTH 2820 (Teleplan Service Application)

Opted-out → HLTH 2771

Q3: Data centre

Use Sky Claims DC V0127 (default)

Or client's own DC number if they already have one

Q4: Activation

Software: Sky Claims | Vendor: Sky Health Technologies

Sky Claims connects to Teleplan production — live immediately

Alberta

Q1: Registered with AHCIP? (PRAC ID exists?)

YES → proceed

NO → AHC 11234 (Practitioner Request)

Q2: Facility registered?

YES → proceed

NO → AHC 0910A (Facility Registration)

Q3: Business arrangement in place?

Existing → AHC 11236 to link to Sky Claims as submitter

New → AHC 11236 (Business Arrangement)

Q4: Who is the H-Link submitter?

Sky Health submits (recommended) → Scenario B

Client self-submits → AHC 2210 + configure client's own H-Link credentials

Q5: Direct deposit set up?

YES → proceed

NO → AHC 1143 (Direct Deposit Request)

Ontario

Q1: OHIP Billing Number?

YES → enter billing number

NO → electronic Provider Registration at ontario.ca/page/ohip-billing-number-registration

Q2: Individual or group billing?

Individual → proceed

Group → Health Care Group Registration + Consent & Authorization

Q3: MCEDT enrollment?

YES → configure credentials in Sky Claims

NO → MCEDT registration via eBSE portal

Q4: HCV required?

YES → HCV enrollment via eBSE

NO → skip

Development Notes

Note: Daily and monthly billing reporting features are planned for a future sprint.

Note: No tax registrations required in Newfoundland, New Brunswick, Ontario, PEI, or Nova Scotia.
